

# PARTICIPATIONS MADE EASY

*BankLabs is revolutionizing the participation process with Participate, the first end-to-end participation loan management tool for both originators and participants.*

Participate is a single platform to manage all loan participations. It allows originators and participants to share loan info, documents, and automate workflow, cutting weeks off the traditionally slow origination process.

## SAVE TIME AND MONEY

Looking to find downstream partners, Participate eliminates the need for phone calls and emails. Just choose who you want to partner with and let Participate do the rest, including electronic NDA's and non-compete agreements.

Once the agreements are in place, the document repository gives originators and participants easy access to documents and underwriting information, eliminating the need for overnight packages or drop boxes.

## EFFICIENT PORTFOLIO MANAGEMENT

After loans are closed, Participate records the pro-rata share and transaction history for each loan. It also notifies each participant when funds are requested or disbursed, keeping everyone on the same page.

The document repository has built in reminders for when documents need to be updated, and automatic notifications to downstream participants when new documents are added.

## NEW OR EXISTING TRADING PARTNERS

Work with your existing trading partners or connect with new ones via the Participate Network of high quality banks. You control who has access to each of your participations.

## FINE TUNE YOUR BALANCE SHEET

Whether it's originating new loans or participating out existing ones, Participate streamlines the process so deals are faster and easier to do, allowing for more liquidity and flexibility when it comes to managing your balance sheet.
