

# BankLabs Participate

BankLabs is revolutionizing the traditionally slow participation process with Participate, the first patented end-to-end participation loan management tool for both originators and participants.

Featuring the BankLabs Participate Marketplace

## Improve Efficiency

Post closing, Participate tracks loan information, pro-rata shares, documents, transaction details, balances and interest rates, all in one place, and automatically notifies participants when there is an update, automating what is traditionally a manual process.

## Speeds Time to Market

From origination through closing, Participate's digital workflow includes notifications, electronic document exchange and e-signature, keeping everyone updated and taking weeks off an otherwise cumbersome process.

## For Both Originators and Participants

Work with your existing trading partners or connect with new ones via the Participate network of high quality banks. You control who has access to each of your participations.

## Balance Sheet Management

Whether it's originating new loans or participating out existing ones, Participate streamlines the process so deals are faster and easier to do, allowing for more liquidity and flexibility when it comes to managing your balance sheet.
